## **Commendation Letter for Alpha Celsius**

As a frozen food company, refrigeration is of paramount importance to us. When we built the SEJ Food Hub in 2014, Alpha Celsius' engineers, project managers and management were instrumental in providing valuable insights and recommendations. They also ensured that the various project milestones were completed on time.

After the project was completed, there were a few occasions which we required urgent assistance due to damages or faults. Alpha Celsius was quick to respond to our requests and rectified these issues promptly. They also consistently provide support for our queries on our refrigeration management system.

We will like to thank Alpha Celsius for the many years of support and partnership and will continue to work with Alpha Celsius on our refrigeration needs. We will definitely recommend them to our business partners should they have similar needs.

Yours faithfully,

Charlie Seo
