I am writing this letter to recommend the services provided by Alpha Celsius Pte Ltd and commend our project management team led by Terence and Justin.

Our Company engaged Alpha Celsius for the development and construction of cold storage facilities housed within our new premises. As we were relatively in-experienced in managing the construction of cold storage facilities at this level and scale we were very glad to receive advice and be aided every step of the way by the team at Alpha Celsius. The management team at Alpha Celsius has many years of experience under their belt and this was shown on multiple occasion when they stepped in with their expertise by providing alternative solutions when met with challenges during the planning and construction phase. Communications and updates were provided promptly and the project was completed seamlessly as expected.

Alpha Celsius has went above and beyond their job scope and responsibility when dealing with our project and I'd personally highly recommend Alpha Celsius to any customers that may require their services.
